

OCCUPATIONAL SAFETY AND HEALTH POLICY

NRC endeavors to develop its services to better cater for the community needs based on the latest scientific methods of drug addiction treatment.

The National Rehabilitation Centre (NRC) recognises that it can only achieve the goals of the mission statement and its strategic objectives by improving the Occupational Safety and Health (OSH) performance of its activities and by understanding the needs of the patients, their families and their communities in the local society and stakeholders now and in the future.

The leadership of NRC is committed to:

- Achieve a high level of OSH performance, gaining and maintaining approval to Abu Dhabi Occupational Safety and Health System Framework and OHSAS 18001;
- Implement this policy through continually improving our OSH management system.
- Limit of injuries, incidents and accidents.
- Consult with and involving our employees and monitoring the health of those who may be exposed to significant work-related health risks or sensitizers
- Provide adequate resources, supervision and appropriate training to enable employees to work safely and use risk prevention techniques, including due consideration of the health and safety of themselves and others;
- Assess all OSH hazards and risks and managing these effectively so they are eliminated or reduced as far as is reasonably practicable;
- Fulfil the compliance obligations related to OSH hazards.
- Measure and monitoring the effectiveness of OSH performance;
- Working towards international best practice in providing patient protection and health care for special needs patients;

Dr. Hamad Abdulla Al-Ghafri
Director General
